Champion Badminton Club to Hold Open Tournament

Saturday March 25 has been set as the date on which the Champion Badminton club will stage their second annual Badminton tournament. About thirty outside contestants are expected to take part, entries expected from Nobleford, High River, Milo, Reid Hill, Vulcan and Nanton. Four beautiful silver cups have been secured for the winners of the competitions. The local club are making every effort to make this event one long to be remembered. Play will commence at 10 a.m. and continue until all events are run off.

Council Names McLean Mayor Of Champion

The first meeting of the new council was held on Monday evening. C. McLean was elected mayor for the current year. H. Cooper was appointed secretary and P. M. Patterson was appointed assessor for the five yearly assessment.

Dog licenses will be \$2.00 for dogs \$2.00 for owned dogs and \$5.00 for a bitch. License tags will be on hand this week and all owners will be expected to procure tags prior to March 21st.

Regular meetings of the council will be held on the first Mondays in January, March, May, July, September and November at 8 p.m.

Champion Badminton club were guests of the Milo club on Friday evening. In the first game the Champion players had difficulty in hitting their usual stride, giving Milo a considerable lead. However, in the games that followed some very close contests resulted and the winners were not evident until the last game was played. The final results gave Milo a lead of 9 points.

Players from Champion: Mrs. Ditt, Mrs. McIntyre, Miss Fath, Miss Bastin, F. Watt, E. Ditt, G. Campbell, A. Anderson, J. D. Henderson, C. Lucia.

Plans were completed for another town tournament, to be held in Champion the last week of March.

All the enthusiasm which has expressed itself in bridge and various other games is now devoted to the working of jigsaw puzzles by Champion enthusiasts. The solving of the puzzles has intrigued young, middle aged and old alike to a wonderful extent.

You enjoyed the "Nut Farm" Now save up your 35c for the 31st of March and come and see its equal, "A Pair of Sides" presented by the Stately Dramatic Society, under the auspices of the Champion Junior C.W.L.

In Memoriam

In loving memory of Mary Elizabeth Smith who passed away March 11, 1929. We are thinking of you mother dear. Thinking of the past. Thinking of you in memory. Just as we saw you last. You left behind some aching hearts That loved you most sincere. That never have and never will. Forget you, mother dear. Ever remembered by her loving family.

Irish Concert Tuesday March 21st

Owing to the interest manifested in the Irish Concert to be held on the evening of March 21, Mr. George Campbell has kindly donated the use of his hall for the occasion.

The programme committee wishes to draw your attention particularly to one-act play, "For The Love of Kitty" which will be a feature of the evening. The cast includes Mrs. Bastin, Mrs. P. Dawson, Miss Jean McEwen and Mr. Joe McNaughton. The little play tells the story of an Irish girl Kitty Maloney who has returned to Ireland after a sojourn in America. She now pretends to be called Katherine Maloney (nay), with the accent on the last syllable. Rumor has it that her hand has been sought in marriage by a butler, a grocer and a policeman—so what chance has her former humble Irish sweetheart? The plot is so charmingly developed and will call forth kindly laughter.

A medley of Irish airs will be played by the high school orchestra. Those who attended the Christmas concert and heard these talented young musicians will certainly wish to hear them again. They are playing twice during the evening.

A quartette, consisting of Miss Ada Williamson, Miss Hilda Campbell, Mr. Donald Stephenson and Mr. Jim McNaughton, will sing "The Weaving of the Green" and "The Minister Boy." This quartette also appeared at the Christmas concert and was well received. It is the successor of the former high school quartette which sang so acceptably on many occasions in the past.

The opening of the new school and the community hall may be called to mind. On the former occasion, Dr. Carpenter, the guest speaker of the evening, especially mentioned their performance. "A valentine said, 'I'm thinking of the Campbell's' by Rheta, Don and Dad, will feature as theme song "My Wild Irish Rose." This is sure to be a treat.

Other items on the programme will include "An Unlucky Deaconess" by Mrs. Shingyink and Mrs. Waidle, a comic quartette, a solo "Paddy J'Nell" by Miss Mavis Moffatt, and numerous other solos and readings by clever local artists.

A enjoyable evening is assured. Admission 25 and 15 cents.

A. J. Miller Is Named Reeve

At the first meeting of the Harmony council on March 15th, A. J. Miller was appointed reeve and E. H. Griffin deputy reeve. C. Rhodes was appointed secretary.

A discussion followed on the requisition of the various school districts. It was decided to lower the rates in some instances, leaving the general rate the same as last year.

A petition was presented to the council favoring free gopher poison for the farmers. This petition was turned down. Only needed repairs will be done in the way of road work this year.

The regular meeting dates were arranged and accounts passed.

Due to an error in last weeks paper the Irish concert was reported to be held on Friday March 31. This should have read Tuesday, March 21. "A Pair of Sides," a play presented by the Stately Dramatic Society, will be presented on Friday March 31st.

Asia's Rural Population

Hardships Endured By Tens of Millions Gradually Growing Worse

Rev. Dr. James Endicott wrote the following in a recent article in the New Outlook: In China there are about three hundred millions of farm folk—one-half of them married women and girls; that is, anywhere from seventy to eighty per cent. of China's population is rural. Africa, of course, is predominantly rural. In India, there are over five million farm villages with vast rice and one-half millions of farm houses. About seventy per cent. of the total population in Japan live and work in rural territory; this in spite of the fact of the enormous growth and development of city life in Japan during the last half century. India is primarily a land of small villages and tiny hamlets. According to the census of 1921 the total population of India, including all the Indian States and Burma, was a little over 318,000,000. Over 250,000,000 of these live in rural communities. In each of these communities the hardships endured are steadily growing worse. In this conviction all competent investigators are agreed. The tillers of the soil throughout Asia, perhaps beyond all others in the world, are receiving cumulatively smaller returns from their land, are being taxed inordinately and are crushed almost beyond endurance under the growing weight of indebtedness. For hundreds of millions the condition is little better than serfdom.

Woman Dentist in North

Hispanic Worker Has Spent Four Years Teaching Eskimos

The north's only itinerant dentist is a youthful-faced, silver-haired woman, Dr. Edna N. Tavelin, who wanted to be a missionary after graduating from dentistry. She combined the two and is now one of the best known dentists of the Eskimos.

Dr. Tavelin travels constantly by aeroplane, dog team, boat and foot, from one government school to another, treating Eskimo children and grownups for bad teeth. She is an employee of the department of the interior with the government medical service.

"The natives are greatly in need of medical and dental care," Mrs. Tavelin said. Their unbalanced diet, combined with the rigorous climate and lack of dental knowledge leave their teeth in bad condition.

Dr. Tavelin has spent four years in the north, many times battling storms and bad weather to aid the Eskimos. She has a son, Carlos, a student in the University of Washington.

History Of English Race

Winston Churchill Accepts \$100,000 From Publishers For Copyright

As well as statesman, has signed an agreement with Cassells to write a \$100,000-word history of English-speaking people. It will take five years, and is his most ambitious literary undertaking to date. The publishers are paying \$100,000 for the copyright.

This is not the largest fee, including royalties, received by an author, but as a single payment in purchase of a work outright it ranks among the highest. Lord Macaulay, for example, received a like sum for volume two and three of his famous History of England.

Stains Being Cleaning

The grimey Nelson statue in Trafalgar Square, London, has been bathed. But the British Admiralty has no money for such luxuries. The statue has not been cleaned since 1916. The process costs about \$2,000. Its coating of London grime is inches thick now, and steps taken eventually will have to dust him off with chemicals.

Monument To Apple Tree

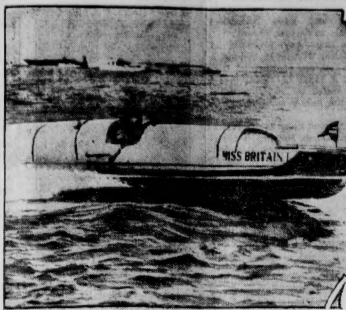

A monument to an apple tree is to be erected at Evesham, to commemorate the discovery of Australia's finest dessert apple, the Granny Smith. Seventy-five years ago a widow, Granny Smith had a small apple orchard and there, from some discarded pit, grew the first Granny Smith apple tree. The tree and its offspring earned a fortune for the widow.

Corillas often reach a height of six feet and have a reach of eight feet.

Galway, Ireland, has dropped its fight against non-Irish games.

W. N. U. 1935

THE LATEST BRITISH CHALLENGER FOR HARMSWORTH TROPHY

In another attempt to wrest speedboat supremacy from Gar Wood, the Royal Motor Yacht Club of England recently named Hubert Scott-Payne, well-known British boat designer and builder, as its entrant in the international race for the Harmsworth Trophy this year. The trophy, emblematic of the world's speedboat championship, is now held by Gar Wood, veteran racer of the United States. Above, Scott-Payne is shown in a close-up at left, and driving one of his power boats at right. The British challenger will use a specially-designed boat, Miss Britain III, in the Harmsworth race, which will be held in September.

Mail Chutes In Skyscrapers

Letters Travel Down At High Rate

If you drop a small envelope containing one sheet of ordinary letter paper in the opening of the mail chute on the eighth floor of the Empire State Building, New York, it will drop downward one thousand feet at an average speed of 13.6 feet per second, or nine miles per hour, arriving in the mailbox at the bottom of the chute in one minute and thirteen seconds. If you drop a large envelope containing five contract forms and one sheet of letter paper, it will drop at a rate of twenty-nine miles per hour and get there quicker still. If it's speed you want, you can get a little better action at the Chancery Building, where, although the distance is considerably less, a large envelope containing five contract forms and one sheet of letter paper will drop at approximately forty-three miles an hour. Justice's law, that the speed of falling bodies increases with the distance travelled, does not apply to mail descending in a mail chute. There is no danger of a letter igniting or getting stuck in a long descent as some irresponsible writer once wrote. The reason is that the mail-chute people utilize a natural up-draftlike that of a chimney, in the chutes to slow down falling mail. Thus the letters go down rather lazily and never catch fire. At the bottom, they strike a smooth, curved bronze plate which slows them down greatly and deflects them against a rubber cushion hanging vertically. From this, they drop gently into the mailbox proper, unharmed.

Some Curious Cargoes

Strange Things Seen In Tour Of London's Dockland

Seen during a tour of London's dockland. Kangaroo tails from Australia and tender tongues from Canada—they are used for soup.

A ram's horn full of extract from the glands of Arabian cats. It is a rare import, priced at about \$19 an ounce.

Fifty tons of sea water brought in a tank in a barge from the sea off the south of France. It is for the London Zoo, and contains organisms particularly pleasing to tropical fish.

Twenty boxes of what look like icy bootlaces. There were vanilla "beans" from Seychelles, West Africa.

Gun bullets from Sumatra for lung troubles, dried rhubarb roots from China, shark oil from Yokohama, mushroom oil from Leningrad.

Rayon production in Italy last year was nearly equal to that of 1931.

The mushroom is very sensitive to changes of temperature and to moisture.

A newspaper plant to be erected in England will cost \$125,000.

Philippo Tomasso Marinetti, author of the futurist movement, has tried something new—a book printed on tin. "Liberty," said the author, "is sacred a word to be printed on paper. It demands a metallic elasticity." The pages are of very light, bendable white tin. The printing is in black. Illustrations are in brilliant tri-color.

Straw stacks on the prairie will be in demand by paper manufacturers.

Mr. West, a Canadian, is now engaged in waste in lumber yards. Mr. West urges a country-wide plan of reforestation—planting two trees where one is cut down.

A scientist has just discovered that plants grow better if the day is prolonged with artificial light. Further investigations prove that the plant which profits most from this treatment is the electric-light plant says London Punch.

Business in Portugal has greatly improved as the result of large 1935 crops.

Alcicut is a French word which signifies "twice cooked."

Business in Portugal has greatly improved as the result of large 1935 crops.

Alcicut is a French word which signifies "twice cooked."

Canadian Red Clover

Superiority Of Seed Has Been Proved

Canadian Red Clover seed is well received in the British Market, where it has demonstrated its superiority to clovers from other countries. A leading Scotch seed firm which pays particular attention to the securing and distribution of the best strains of clover crops describes Canadian Red Clover, which is offered as an early strain of Broad-leaved Red, as an extremely hardy and invariably giving it the best results in trials at the West of Scotland College. In the firm's catalogue is a striking illustration showing plots of various strains of clover grown for comparison. In this the growth and hardness of the Canadian type is noticeably better than that of the English and remarkably superior to the Polish and Chinese varieties.

An Economy Measure

Alberta Government To Close Down Normal School In June

As an economy measure, the Alberta government will close the \$600,000 Normal school in Edmonton and the agricultural school at Vermilion at the end of June, according to an official announcement by Premier John Broome.

Normal school estimates introduced in the legislature provide \$10,425 to meet teachers' salaries until the end of June.

Present conditions, Mr. Broome said, make this step necessary. If there is any improvement shown when June arrives, the government may consider its decision.

Sugar Beet Production

The latest available returns for the complete production of sugar beets in Canada are those for 1931 when the harvest was 455,992 tons. The highest previous figure was 397,676 tons in 1930, and the next highest 370,047 tons in 1925. The total acreage for the Dominion in 1931 was 43,537 compared with 40,552 acres in 1929 and 34,803 in 1925.

The mushroom is very sensitive to changes of temperature and to moisture.

A newspaper plant to be erected in England will cost \$125,000.

Oldest Regiment in World

Honorable Artillery Company Was Founded In 1387

Following the death of the Earl of Denbigh who commanded the Honorable Artillery Company of London, England, for forty years, Lord Galloway, an ex-officer of the Lord Galloway, has been named his successor. A proud honor it is because the H.A.C. as it is known in London, is the oldest regiment in the world.

It was founded in 1387 when Henry the Eighth granted a charter to the Guild of St. George to encourage the science of artillery. But artillery at that time simply meant bows and arrows and "handguns," whatever the hand guns of 1387 were like. Since 1641 the armories of the H.A.C. have stood in Bunhill Fields within the City of London, near the cemetery in which John Bunyan is buried. The then Prince of Wales, afterwards Charles the Second, joined it as an officer, and since then either the reigning King or Prince of Wales has been an officer in command of a company.

Although an artillery regiment it has also an infantry battalion, and membership requires that the applicant be "something in the city." Many wealthy men serve as privates. During the World War it had a noble record. Altogether 12,847 men served in the H.A.C. How much it is the fact that of that number 5,901 were killed, died of sickness or wounded. It won 23 decorations, including two V.C.'s. During the war over 4,000 men obtained commissions.—St. Thomas Times-Journal.

A Splendid Spirit

Saskatchewan Remedies Prepared To Cut Bills For Rural Municipal

The Saskatchewan Medical Association is prepared that bills owing its members by rural municipalities should be cut in half. Here is a proposal suggestive of generosity and a willingness to share the common sacrifice.

The medical profession has been as hard hit as any other calling in this depression. There are as many sick ever, and as many more, and they have to be attended to, but not a few doctors have almost been forced to the wall through inability to collect fees. They are as needy as any other, but there is little money in it. The decision communicated to the convention of the Saskatchewan Association for Rural Municipalities reflects a good spirit.—Regina Leader-Post.

Valuable Carpet Lost

Turkey Is Searching For Relic Valued At \$200,000

Turkish public opinion is busily engaged in guessing what has become of the most valuable relic of the past that Turkey possesses; the mantle belonging to the famous Arab philosopher, Muvahhidin at Arabi, a seven-hundred-year-old felt rug carpet, probably the oldest extant. During the Great War both of them, as well as other precious objects, were withdrawn from the renowned Sadreddin Konevi library at Konia with a view to protecting them against theft. Later on they were sent to the Constantinople Evke Museum, but it now appears that they never reached their destination. The carpet is said to have a commercial value of about \$200,000.

Book Printed On Tin

Philippo Tomasso Marinetti, author of the futurist movement, has tried something new—a book printed on tin. "Liberty," said the author, "is sacred a word to be printed on paper. It demands a metallic elasticity." The pages are of very light, bendable white tin. The printing is in black. Illustrations are in brilliant tri-color.

Making Paper From Straw

Success Is Expected From Experiments Being Made In Calgary

In the near future straw will be used to make paper in place of pulp and rags, according to Arthur West, Calgary manufacturer. Only one ingredient for the manufacture of paper from straw is lacking, Mr. West says, but he believes the solution will be found through experiments now being made.

Straw stacks on the prairie will be in demand by paper manufacturers.

Mr. West, a Canadian, is now engaged in waste in lumber yards. Mr. West urges a country-wide plan of reforestation—planting two trees where one is cut down.

A Nature Note

A scientist has just discovered that plants grow better if the day is prolonged with artificial light. Further investigations prove that the plant which profits most from this treatment is the electric-light plant says London Punch.

FANCIFUL FABLES

High Commissioner's Office In London Sends a Warning Note About Cattle Export Trade

Too much importance cannot be placed upon the receipt of the following paragraphs from a report based on a thorough investigation by the High Commissioner's office of the situation in regard to the export cattle trade. A note of warning which we cannot afford to ignore is quite apparent in these paragraphs, which should be placed before every person interested in avoiding any action which might tend to jeopardize the development of our export cattle trade in Great Britain.

"It is now generally recognized that there has been an improved selection of steers for the export trade in recent years, and their popularity here has spread accordingly. Dealers and buyers are peculiarly sensitive to disappointment when the standard of excellence drops below the average. The burden of returning a reasonably good price for common sorts of livestock imposes a difficult task on salesmanship, and consignees appreciate the adverse effect on business of unfavorable price returns. Constantly they are telling the shippers what the trade wants and urging them, diplomatically, to choose export cattle carefully for type, weight, age and conformation. But the shippers are being more and more dissatisfied, tend to move readily to harassing experiences than does the trade in general.

Healthy heifers and cows have been taken of and written about frequently. There has been created an atmosphere of hopeful expectancy. The value of good stock is an additional consideration. Its place in the respective sections of the British trade is high, and the fact should be weighed carefully by the Canadian shippers.

"It is not possible to forecast with any accuracy the future of the trade in breeding and dairy purposes, can be selected and shipped to advantage. That will be determined only by trial and experience. However, the trade demand for suitable stock is the more preferable and prudent policy, over-feeding it with common sorts, especially at the outset, will stunt, and may even damn, a promising potential trade.

"She-stock selected in Canada for breeding or dairy purposes, and sent to Britain, and lacking the characteristics fitting to the ideas and needs of the people specializing in these particular activities, will not find buyers, except at uneconomic prices. Experiences of this sort will give, in addition to uneconomic prices, a wrong impression in Great Britain as to the value and usefulness of our she-stock, a condition that will cost the producers and shippers considerable money, and one that will be difficult to correct. The same thing applies to our steers going into new areas.

"Such a result, if it were possible to forestall, should not be permitted. Even extreme precautions to safeguard the new trade, and the new opportunity, could be justified. Furthermore, I misjudge the trade here if they would not support concentrated action, at the outset, to attain this desirable objective.

"For the general guidance of shippers who are considering the possibilities of serving the dairy industry with either heifers or springer cows, freshening three or four weeks, including, the great majority of the dairy farmers prefer a good size animal, which, of course, should possess milking qualities and conformation. The breeds most favored are cross Shorthorns or crosses out of Holstein and Ayrshire by a Shorthorn bull. Purebred Ayrshires or Holsteins are not favored unless they are of the top class. The dairy Shorthorn type and size is what dairymen have in mind.

"One dealer suggests that: 'Shippers who give the fullest information as to probable dates of calving; what kind of sire produces the calf; and what age the cow is—whether first, second or third calf.—will recommend cows about four to five years old, carrying second or third calf. First calf cows would not sell as well, owing to the prospect of smaller milk volume during first calf period.' 'The first choice in Scotland, for heifers for beef breeding purposes is well bred Angus or their crosses. Shorthorns are second. Herefords are not popular. In England the Hereford takes a better place.

"Realizing and sustaining profitable results in building our cow business will depend very largely upon the direction and conduct of the

Plenty Of Reading Matter

Convicts In Canadian Prisons Supplied Books and Periodicals

Whatever he may lack in the apportionment of life, the convict in a Canadian penitentiary need not go without his reading. A bulletin of the Dominion Bureau of Statistics makes this plain. In our seven penitentiaries, at the time this survey was made, were 3,748 convicts, and in the seven libraries were 45,342 volumes, to wit: books of 45,342, and periodicals of 1,614 in 1931.

The largest library is in Kingston, where 19,463 volumes are at the disposal of Col. Megloughlin's "guests," or 24 per cent. The smallest is at New Westminister, B.C., where the average is but four books per prisoner. On the other hand Dorchester, N. B., leads all with 81 periodicals, and at Colby's Bay there, according to some critics, preferred convicts live solely in great comfort, periodicals number but 24, and there are only seven books per man.

These statistics are interesting, but they leave the best part of the story untold. One should like to know the extent to which prison libraries are used by convicts, the sort of reading done in the penitentiaries. Is fiction the favorite, and what type of fiction? Do they prefer romance with a happy ending?

Probably their tastes are about the same as those of any other group of men outside the walls.—Ottawa Journal.

Novel Device For Students

Signal Consists Tardy and Welcomes Punctual Ones At Lectures

A novel device for welcoming students to lectures and censuring tardy ones has been introduced by Dr. G. M. Shrum of the department of physics, University of British Columbia.

A "welcome" sign, vividly outlined green, greets each one entering the lecture room; and an automatic counting machine registers his attendance. Late-comers, however, are reminded of the fact by a red light of bells and the sign "Late again."

The signal changes are controlled by the professor behind his desk. A beam of invisible ultra violet light, which is cut by each student as he enters the room, is the basis of the invention. The effect of the interrupted beam of light on a photo-electric cell causes the ringing of bells and the counting of each entrant.

Sense Of Humor Left

And Most Western Farmers Still Possess Their Optimism

The National Revenue Review gives the following as the answer made by a prairie farmer to an income tax inspector who enquired about his income over a period of years:

"You asked about my crops for the last five years; well, I'll tell you. In 1924 I was dried out; in 1925 I was hailed out; in 1926 I was frozen out; in 1927 I just walked out, and I'm still out."

Notwithstanding it all, this farmer seems to have retained his sense of humor and, as he is a westerner, we are also willing to stake that he continues to possess an abundant stock of optimism.—Brookville Recorder and Times.

Soap should never be used on white silk. It should be dissolved in water before laundering is begun.

WIND AND STORM SWEEP LINGER ON TO SANDRANK

Above we see the trans-Atlantic liner "Montrose" being pulled off a sandbank on Askew Spit, near Liverpool, after all the passengers had been rescued and taken to Liverpool. The "Montrose," for more than two days buffeted by wind and storm, was only one hour from her destination when the high wind proved too much for her and she was forced high and dry on the treacherous sandbank. Fortunately no damage was done to the liner and the passengers suffered very little inconvenience.

Chinese Women Going Through For Medicine

Large Percentage Of Students Eager To Become Doctors

Dr. Josephine Carrier Lawrence, of Shanghai, was the only woman doctor elected to fellowship in the American College of Physicians last year. She is the doctor of the hospital of the Women's Christian Medical College in Shanghai and all her staff are Chinese. She trains young men and women as doctors and nurses and oversees a hospital of more than 200 beds.

Interviewed at Montreal when attending the annual clinical session of the American College of Physicians Dr. Lawrence said: "It is interesting to know that more than 10 per cent of Chinese women students at colleges in China are going through for medicine in comparison to four per cent of women students in American colleges. Chinese women are not less students, far more eager to learn than their western sisters."

"In their country traditionally a scholar reads very high and as the background of Chinese life is philosophy they are intrigued and interested in science, which is complicated. They acquire the English language so they may study. They retain Chinese dress as more becoming. They take up medicine because it is so much needed. A Chinese girl student or doctor is on the same footing with a man. Her learning makes her his equal. Dr. Lawrence will spend one year on this continent to learn the latest discoveries in medicine and then will return to the east."

Lack Of Phosphorus Causes Tooth Decay

According To Results Of Experiments By Dr. Agnew

Tooth decay is primarily due to lack of phosphorus and Vitamin 'D' in the diet, according to the results of research made by Dr. R. Gordon Agnew of the West China Union University. Working with hundreds of laboratory animals, Dr. Agnew was able to produce tooth decay in practically all the cases by depriving them of these two food elements.

Eating sugar, candy, and other sweets, it was further indicated by these test diets, has no effect in itself in causing tooth decay, except that by satisfying the appetite too quickly it tends to keep down the intake of the foods which contain the elements which do make for sound tooth structure.

Dr. Agnew says that among the Tibetan tribes in particular, where tooth decay is especially infrequent while their diet is highly restricted, the eating of whole corn, an important article of their daily food, supplies them with adequate phosphorus while their out of door life in the sunshine assures them of plenty of Vitamin 'D.'

Qualified For Entry

A very respectable-looking old man presented himself at a hospital for cats and dogs, and asked to be taken in.

"You can't come in here," he was told.

"Oh, yes, I can," he protested. "I'm an old soldier."

"But, my good man, you can't. This is a veterinary hospital."

"That's right," answered the old man serenely. "I'm a veterinarian."

Of the 2,000 known kinds of germs and bacteria, only about 100 are believed to be harmful. The other 1,900 varieties are necessary to life in one manner or another.

Value Of Life Insurance

Interesting Statement Made By Hon. Charles A. Dunning

Hon. Charles A. Dunning, former Canadian finance minister, made an interesting statement with respect to life insurance in his annual address as president of the Ontario Equitable Life when he said: "Life insurance as an institution is at once the greatest debtor and the greatest creditor in Canada; the greatest Canadian debtor, or because its contracts to pay are larger in volume than any other in our national structure; the greatest Canadian creditor because it has accumulated in small amounts with respect to the five million lives insured over two and one-quarter billion dollars, which it has loaned to governments, municipalities, school districts, railways, utilities, industries, its own policyholders, and also on mortgage."

How To Eat Oysters

Price Of Wales Recovers Pointer From An Authority

"What is the proper way to eat oysters?" asked the Prince of Wales recently, when seven-year-old oysters fresh from their native beds, were laid before him, at an oyster farm, should you take vinegar or not on the oyster, or both," he asked. The manager replied: "Never, sir, the best way is to eat them clean."

A WELL BELLOPED AFRICAN TYPE simple and easy to slip into. It's the simple type that needs no introduction. It hugs the figure, being pulled at the front to create a slender line. It also has deep inset pockets either side of the front, so essential to the busy housewife.

You'll make it all deep open armholes. And this for two good reasons. One is that coolness will be a desirable quality. Another is that it will not crush the sleeves of the frock.

You can make it at a big saving in cost. You can almost run it up before breakfast on the sewing machine. So easily got together.

Style No. 821 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 2 yards of 29-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Sometimes what seems a prosaic business transaction has behind it a world of romance and high adventure. Such was the case when the Department of the Interior, early in 1932, received from the Northwest Company, Limited, a cheque for the amount of the first royalty payable to the Government on the production of the Company's petroleum from the Norman in the Northwest Territories, nine hundred odd miles, as the Canada goose flies, north of Edmonton. That slip of paper contained only ten or a dozen words, but how much of faith vindicated and work accomplished it revealed.

In 1921 the Northwest Company struck a flow of petroleum, reported at that time to be about at the rate of 100 barrels per day, in what is commonly called the Norman well situated on the bank of the Mackenzie thirty-three miles below Norman. The well was completed in 1923 and as there was no immediate local use for the petroleum it was capped to prevent waste.

When it became clear that there was oil in commercial quantities half way down the Mackenzie between Great Slave Lake and the Arctic Ocean, development began, and speculation as to what would be done about it. Common comments were that the oil was useless where it was and that the Government had no special proposition. It was held that it would be out of the market until the southern wells went dry and even then it would be sold to the Government in nine hundred miles or so and thousands miles to rail head, or pumping it up hill through a pipe line for some distance, would be prohibitive.

Then came the aeroplane, and maps made from aerial photographs. Prospectors and their supplies were taken in from rail head in as many hours as it formerly took weeks, and were moved from location to location by equal speed. Steamships and tractors, canoes and dogtrains were in use, too, but it was the aeroplane which carried the master key to the doors of the North.

The mineral deposits about the east end of Great Bear Lake were discovered by development began, and there was a demand for gasoline and fuel oil. Great Bear Lake empties into the Mackenzie River through Great Bear River, at the mouth of which latter Norman is situated. The Norman oil source in 1932 was, therefore, comparatively speaking, not too distant in customary means of water transportation (except one portage around a stretch of rapids in the Great Bear River) from the well to the east end of Great Bear Lake. The Northwest Company, which had brought in a small refining plant in 1921, opened this up in the spring of 1932 and supplied gasoline and fuel oil for running motors and Diesel engines in the mining camps. It was up to this production that the royalty was paid, and while the output so far has been relatively small this commercial use of northern oil is a fulfillment of well grounded predictions of ten years ago and a promise of greater things to come.

Can Tell Nationality Of Customers By Their Shoes

Americans occasionally hear traveling in England like to be taken for Englishmen. One of this group, a Cleveland (traveler), was in London, when he saw a sign in a shop window: "Lace outfit—suit, hat, linen, gloves, overcoat and cane."

Dressed in the outfit, he walked out to the steps of his hotel and stood there a moment contemplating the weather. Just then a dashing, athletic looking fellow, came dawdling toward him crying:

"New York Herald—here you are!"

It was a vendor of foreign newspapers in Paris who told the story of his skill in spotting the nationality of prospective customers. "I'm a specialist," he said.

CHAPTER VII.—Continued

In his cabin, with the steamer throbbing on toward Steel-Edd, Alan wondered what Joyce's reaction would be if he should go to her and frankly tell her about that tragic incident in his life which had brought about his engagement to Elizabeth. Joyce would understand his motive. She would no longer think he'd acted of his own free will. Perhaps if she knew this truth, she might allow him to resume their old intimacy. . . . But Elizabeth, what of her? She was waiting, waiting there at Reduranc, for him to marry her. In honor and faith he could not break away now. That secret and powerful circumstance still bound him and would bind him to her all his life.

A half-mile up in the fleecy clouds up above the pretty city of Edmonton, Mr. "Buzard" Featherfoot was dropping out top parachutes carrying free cakes and printed matter of the E-Z Klean Soap and Washing Powder Company, Ltd. He was tired, stiff, hungry and incredibly bored.

During the late war Buzard had

knocked an assorted number of Pokers, Taubers and Albatrosses out of the air; had come down himself a magazine in British Columbia, had worked a season with the Manitoba Fire Prevention as a "smoke hawk"; had bombed paper-mache French chateaux down amid the flowers and climate of Los Angeles.

Recently, tired of working for other folk, he had raked together some money and bought a machine of his own, which he now was flying.

It was a queer nameless contraption, this monoplane of his—an assemblage of piano wire, canvas, spruce and iron, held together by luck and Buzard's lizardry at flying. It had originally been a White Speedster, with "Jenny" engine, but he had redoped the fabric and put in a second-hand Whitebird and equipped it with third-hand under-gear of the float-wheel type, and overhauled it generally till little of the original machine remained. Only his warm friendship with the aviation inspector kept it from being junked. But somehow—and this is the rock-bottom fact of any flying machine—it had never yet come down before Buzard wanted it to. And it did have speed; anything lacking speed would never have satisfied him. Such as it was, it was his very own; and no one else was ever prouder of a crushed snaggle-toothed child than Buzard was of his White Speedster.

He was, however, ambitious to get a big new De Havilland, so that he could safely take a girl down in Kamloops and carry her along with him on his airy path of life. But with no advertising or big company

to back him, Buzard had found this free-lance work to be tough sledding. Had found difficulty keeping up repairs on his old machine, let alone getting a new one. Jobs were sheer accidents. Except for the faint possibility of murdering some more grasshoppers over near High Hat, the work he was finishing this noon was the last thing in sight.

As he heaved overboard the last of the E-Z Klean Soap and printed matter, and headed back for the landing field, he yawned and swore: "The devil with this peace-time stuff! Oh, Lord, I wish they'd bring on another unpleasantness."

It was in some such frame of mind, as he landed and crawled out of the cockpit, that he saw a tall lanky individual, in lace boots, khaki trousers, jacket and gray hat, get out of a waiting taxi and saunter toward him. The stranger, as he came up, looked at the machine with that peculiar respectful gaze of a person who has never flown in one.

Buzard thought, "If that fellow asks me to take him for a joy ride, I'll murder him with a monkey-wrench!" A moment later, as he got a closer look at that dark purplish face, he decided: "No, he's not that kind. Looks like some timber dingo. Maybe wants me to fly him out to his limit. Thirty-dollar joy-dam-viding!"

The stranger came on. "Hello, Buzard," answered tartly. "Hello yourself."

The stranger paid no attention to the brusque reply. Instead he reached out his hand. It was a good-looking hand, big, calloused, fingers like iron bars.

"Name's Baker," he introduced himself. "Alan Baker."

Buzard partly thawed. This fellow Baker looked to be somebody. His slow smile was mighty fetching; his clear intelligent eyes were kindly, warm, friendly.

"Glad to know you, Baker. Mine's Featherfoot—James Albatross Featherfoot."

"Good gracious! All that? But what do people call you?"

"They both grinned. 'They call me Buzard.' Wear red helmet; never stop my wings."

"Buzard"—that's more like it. I saw you sailing around up there when I got off the train. Made inquiries and hustled out here to the field. Was on my way down to Winnipeg. Expected I'd have to go down there, or maybe to Calgary, to find a machine and a pilot."

"Uh-uh."

Baker jerked his thumb at the plane—"Whose is that?"

"Looking at you. Belongs to me and myself. Unfitted. Bought it with cigarette coupons."

Baker jerked his thumb at the plane—"Whose is that?"

"Looking at you. Belongs to me and myself. Unfitted. Bought it with cigarette coupons."

FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIANT" 72c package.

This package is a trial container with a separate trial bottle—sufficient for about two weeks' use. It contains 14 tablets, 10 in the box, and 4 in the trial bottle. It is a trial bottle, and it is a trial offer. Your druggist is authorized to return your trial bottle, and to refund your money. Write to: Kruschen Laboratories, Ltd., 1000 University Avenue, Toronto, Ontario.

"That would take me some time to explain. I wouldn't want any man to back it without him understanding the whole thing, or then he might feel I'd dragged him into trouble."

Something in Baker's tone made Buzard look at him sharply. "Nothing ill—come out of the ordinary, is it?"

"It's all three, and then some. Buzard bit his cigarette. "And then some! My eyes! Where you declaring war on?"

"If you want to know who I am, I am in the Mounted. The O.C. here at Edmonton can tell you about me. And I can give you other references."

"You were in the Mounted?" Buzard asked thoughtfully. "Baker—the Mounted. . . . Say, haven't I heard or read somewhere . . ."

"You were in the Mounted? Baker down north near the Arctic?"

Alan nodded.

"My eyes! I read about some of your doings. You're on a detective trick or something like that, Baker?"

With expert judgment Alan had been sipping up his new acquaintance, from his bricked-in, dog-eared, across his oil-spattered jumpers, to his "side-wink" shoes. He read the dardervility in this Featherfoot. He was a man after Alan's own heart.

And he had a machine of his own! If he'd go, it would save precious days looking for a plane and pilot.

Alan said: "My story is a long one. You look as hungry as I feel. . . ."

"I am, Baker. Let's go eat and then talk."

Alan helped him pull a canvas over the machine. Together they stumbled down to the taxi. As they rambled down the street they swapped war yarns, discussed several mutual acquaintances and came down to "Alan and Buzard."

At the Chateau MacDonald Alan sent a telegram to Colonel Steele in Victoria. He wrote it swiftly, not daring to think twice of the fatal error.

"Am out of Mounted accepting your fine offer will you wire me five hundred as salary advance would be mighty grateful letter following with details."

"ALAN BAKER!" He and a lizard ate dinner; and then for a solid hour Alan talked.

He told of the Midnight Sun robbery, of the chase, flight, escape, of Dave MacMillan's trouble; of his resolve to help Joyce; of Joyce going bravely back to the lonely trading station; of his run-in with Haskell, his getting hustled, his buying out a service, his thousand-mile trip to Edmonton.

"But just where do the old crate and me come in at?" Buzard asked. To Be Continued.)

Low Price For Potatoes
U.S. Farmers Left Over Million Bushels in Fields Last Fall

Enough potatoes to have saved Ireland from its potato famine three-quarters of a century ago were left in the fields last fall by United States farmers, who found it didn't pay to harvest them. The Department of Agriculture estimated that 1,600,000 bushels were left in the field, mostly in Minnesota and North Dakota. It is said 220,000,000 bushels were harvested, of which nearly one-half had been sold on January 1.

Mr. Richman—"I have a Rembrandt, a Rubens, a Van Dyck, and a Peala."

Miss Slowen—"Is that so? But what do you want with four cats?"

India's foreign trade is again increasing.

MINARD'S "KING OF PAIN" OINTMENT

Over-Production Of Tea
Supply Greatly Exceeds Demand and Market Is Glutted

There have been for some time past two policies before the tea industry. One was to restrict production in the hope thereby of forcing up prices. The other was to leave production untouched but to seek foreign markets.

The latter policy is almost impossible to carry out in the face of restrictions on trade in every quarter. In microcosm the tea industry reflects the troubles of all the big industries of the world, world production is at least 20 per cent. ahead of world consumption. The market is glutted with tea. London stocks at the end of 1932 were forty-one million pounds in excess of stocks at the end of 1931. And as output has increased, so have prices slumped. The old distinction between medium and common teas has disappeared, and if the unrestricted production of the last year or two could make the price for good tea will go the same way too, and about one-third of India's tea gardens will be forced to close down.—Calcutta Englishman.

"Show me Thy ways O Lord; teach me Thy paths."—Psalm 24:1.

That which is so often asked of God is not so much His will and way as His approval of our way.—S. F. Bailey.

When we cannot see our way, Let us trust and still obey. He who bids us forward go, Cannot fail the way to show. Though the sea be deep and wide, Though a passage seem denied, Cannot fail us still to proceed, Since the Lord vouchsafes to lead.

There is nothing like the first place we get at duty before there has been any special pleading of our affections or inclinations. Duty is never uncertain at first. It is only after we have become involved in the mazes of wishing things were otherwise that are that it seems indistinct. Considering a duty is often explaining it away. Deliberation is often dishonesty. God's guidance is plain when we are true.—F. W. Robertson.

Miss Campbell's Recipe for Cup Cakes

1 cup butter 2 cups sugar
1 cup eggs 100 lbs. flour
1 cup sugar 100 lbs. flour
1 teaspoon vanilla 1 teaspoon Magic Baking Powder

Cream butter thoroughly; add sugar a little at a time, beating well. Add vanilla of eggs and vanilla, beat well. Sift flour with baking powder and salt, and add alternately with milk, to first mixture. Fold in stiffly beaten egg whites. Bake in greased cup cake tin, or in paper baking tins, at 350° F. for 25 minutes. Serve warm from the oven, sprinkled with powdered sugar. Or, add and from the top. You will find many delicious frosting recipes in the Magic Cook Book.

"Cup Cakes are delicious when made with Magic Baking Powder,"

says Miss Helen Campbell, Director of The Chateau Institute

"Good baking goes hand in hand with good materials," Miss Campbell will tell you.

That's why Magic Baking Powder is used and recommended by The Chateau Institute. Magic meets all the Institute's right requirements of fine quality—repeated tests have proved it absolutely pure, uniform and dependable.

The majority of dietitians and teachers of cookery throughout Canada plan their recipes for Magic. They use it exclusively because they know it gives consistently better results.

And 3 out of 4 Canadian housewives say Magic is their favorite. Magic meets all the Institute's right requirements of fine quality—repeated tests have proved it absolutely pure, uniform and dependable.

Remember—substitutes are never as good. Do as the experts do. Use Magic Baking Powder.

Free Cook Book.—When you bake at home, the new Magic Cook Book will give you dozens of recipes for delicious baked foods. Write to: Standard Baking Powder, Ltd., Fraser Avenue and Liberty Street, Toronto, Ontario.

FOR ANY PAIN
Have you ever found any quicker relief than this?

Anyone can take Aspirin, for doctors have declared these tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as in any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neur-

itis, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results—and you know there will be no ill effects. You know what you are taking.

Why take chances on some form of relief which may not be as swift—may not be as safe? The new reduced price on bottles of 100 tablets has removed the last reason for over-experimenting with any substitute for Aspirin!

Aspirin is a trademark registered in Canada

Baker Jerked His Thumb at the Plane—"Whose is That?"

Baker's face brightened a little, and now Buzard noticed that this hard-bitten man was deeply worried but was hiding his trouble and talking with a jest on his lips.

"So the machine belongs to you. Glad to hear that. Working on your own hook, I suppose? That's still better. Say, Featherfoot, how long are you looked up ahead?"

Buzard had found it good policy to lie. If he made out there was a crushing demand for his services, it impressed people and got him jobs—sometimes.

"Oh, about two months," he said carelessly. "All depends on how much flying weather I get."

Baker plucked a blade of grass and chewed it meditatively. Finally he asked: "Say, Featherfoot, you couldn't shake free for a couple of three weeks, could you? Get sick, or have to get married, or something like that?"

Buzard took thought as he talked an eye. A couple or three weeks. . . . Must be a good-sized job. . . . might pay well. . . . Oh d-d the pay! Always thinking of pay. Getting commercial. . . .

"I might," he answered. "Depends. What kind of flying do you want me to do? What for a job is it?"

U. S. PRESIDENT HAS EXTENDED BANK HOLIDAY

Washington. — By proclamation, President Roosevelt extended the modified United States banking holiday indefinitely, exercising the powers conferred upon him by congress in emergency banking legislation which he had signed earlier.

The chief executive also proclaimed an extension of the embargo on gold.

All the provisions of the proclamation were continued in full force and effect. This meant also a renewal of the ban on hoarding.

The proclamation is to remain effective until ended by another proclamation.

The national emergency still exists, read the decree, and it is necessary to take further measures extending beyond March 9 in order to accomplish such ends as are suggested by the original proclamation of Sunday.

The president said, "All the terms and provisions of the March 6 proclamation and all regulations issued thereunder continue in full force and effect."

It is understood the purpose is to give the secretary of the treasury further time in which to administer the emergency banking law enacted recently by congress which has permitted immediate reopening of sound banks.

Congress placed in President Roosevelt's hands the legislation he had asked to meet the United States banking emergency.

Final congressional approval came with passage by the senate after three hours' discussion which developed a bitter exchange between Senators Glass of Virginia, and Long of Louisiana. The latter criticized the measure offered inadequate protection to small banks.

Earlier, the House had approved the measure with only 10 minutes debate, attesting the speed with which congress was functioning to meet the banking emergency.

The senate vote, by roll call, was 73 to seven. House action was unanimous.

Cut Hollywood Salaries

Motion Picture Producers Feel Financial Pinch

Hollywood, Cal.—Cessation of all activities at all motion picture studios in Hollywood was ordered early today by the Association of Motion Picture Producers unless drastic cuts in salaries and wages were made within a period, due to the banking situation, in which all employees and artists.

For salaries more than \$50 weekly, a cut of 50 per cent. for the eight-week period would be made with a minimum salary of \$37.50 established. Those earning less than \$50 weekly would take a 25 per cent. cut with a minimum of \$15 a week. The cuts would be retroactive starting March 6.

Must Pay Legal Costs

Halifax Lawyer Awarded Judgment Against Veregin

Halifax, N.S.—J. J. Power, K.C., Halifax lawyer who argued in supreme court on behalf of Peter Veregin, has been awarded a judgment for \$661 against the Doucet leader. Costs of \$35 were added to the amount by Judge W. J. O'Hearn in his decision.

Shortly after Veregin was freed from the threat of deportation to Russia, litigation was opened on Mr. Power's bill.

It is understood a settlement of the account will be made with little delay.

Break Up Parade

Vancouver, B.C.—A parade of several hundred women and some men who planned a demonstration in front of the city hall, was broken up and the participants dispersed by police. One man, Gus Carstern, was struck on the head by a police baton during the melee and was removed to hospital for treatment.

Purchasing Radio System

Ottawa, Ont.—The Canadian radio broadcasting commission will purchase the radio broadcasting system of the Canadian National Railways. It was understood the purchase consisted of three stations, one in Vancouver, the others in Ottawa and Montreal, N.B.

W. N. U. 1935

Board of Censors

Plan To Form Joint Board in the West

Edmonton, Alberta.—Alberta is requested to join in forming a joint board of censors in the western provinces in a bill to amend the Theatres Act, introduced in the legislature by Premier J. E. Brownlee.

The proposal to create a joint board of censors for the west was made first in October, 1931, at an inter-provincial conference in Calgary. It was understood the plan was approved by all the provinces except British Columbia.

The proposal came up again at the interprovincial conference in Winnipeg this year and with introduction of such a bill in the Alberta legislature it is believed the prairie provinces plan to carry out the scheme. The bill also empowers the Lieutenant-Governor-in-Council to require a proportion of the films shown in Alberta be of British manufacture.

Vote Against Fighting

Victory College Students Oppose Taking Up Arms For Country

Toronto, Ont.—Men and women students at Victory College, by a majority of six, voted "that this house will not, under any conditions, fight for its king and country." About one-tenth of the 1,034 students registered at the college attended the debate. About half of these present were women. There were several unusual scenes. A white feather professed by a girl student was enthusiastically accepted by young men attending. The League of Nations was termed "half-baked idealism" and a "glorious failure." Pacifism was called "a damnable sin" by a co-ed.

Laws Should Be Uniform

Hon. R. J. Munro Advocates New Regulations For Truck Traffic

Ottawa, Ont.—Uniform regulations throughout Canada are needed for truck traffic in competition with railroads. Hon. R. J. Munro declared in the House of Commons.

The railway minister intimated additional measures were being taken to make uniform the various regulations throughout Canada.

A questionnaire had been sent out, and when replies were received officials of the various provinces would probably be brought to Ottawa with a view to arriving at some equitable solution of the vexatious situation of rates for the buses and trucks.

Consigned To The Sea

Four Hundred Gallons of Pure Alcohol Dumped In Harbor At Victoria

Victoria, B.C.—Four hundred gallons of pure alcohol, valued at approximately \$10,000 went into the sea recently.

Officers of the Royal Canadian Mounted Police, on instructions from the customs at Ottawa, poured that quantity into the waters of Esquimalt harbor.

The liquor was seized by the American or British customs at the American-owned gasoline launch "Advance," which was captured in the Gulf of Georgia on its way to the mainland.

Aids Empire Products

Schedule Introduced In Australia House To Reduce Duties

Cannberra, Australia.—A schedule reducing substantially the duties on 51 commodities from empire exporters was introduced in the House by Louis-Col. T. W. White, Minister of Customs.

The bill represents the first instalment of application of articles from nine to 14 inclusive of the agreement of the imperial conference. The chief reductions included in the bill introduced recently are on wool, felt, fur goods, hats, coats, stockings, wireless goods and rabbit traps.

Wheat Prices In France

Paris, France.—The price of wheat would be increased about 10 cents per bushel by a bill approved by the cabinet in which the price would be stabilized at approximately \$1.25 per bushel. Inferior wheat would be taken off the market and used for feeding.

Want British Destroyers

Cannberra, Australia.—Prime Minister Joseph Lyons announces the Australian government is negotiating with the United Kingdom for replacement of destroyers in the Australian squadron by four destroyers of the latest type from the British navy.

Report Not Confirmed

Ex-Kaiser May Have Abandoned Claim To German Throne

London, Eng.—A spokesman of former Kaiser Wilhelm II, seeking to regain the throne of Imperial Germany as a result of recent events there is stated to have "vanished" through the former sovereign's own act.

If the London Daily Mail's correspondent at Deen, Holland, is accurately informed, Wilhelm Hohenzollern has completely and voluntarily abandoned the claim which he has often been credited with again yielding power over his own people.

Latest he is reported seeking permission to spend his declining years in the privacy of his castle at Homburg Vor Der Höhe, the famous mineral spring resort in the Eifel-Nassau. He was 74 years old in January.

Any anxiety the ex-kaiser may have felt concerning the attitude of his sons toward his abandonment of claim to the throne were reported removed by a kind of contradictory document of abdication. At a recent family council in Deen, the sons were reported to have turned over all their "rights" to the throne to the ex-royal prince for his disposal.

Hit By Financial Crisis

Former Kaiser May Lose Money As Result Of U.S. Situation

London, Eng.—The former German Kaiser probably will be obliged to cut his household expenses as a result of the financial situation in the United States, the London Daily Mail's Deen correspondent reported.

Wilhelm also was said by the reporter to be anxiously watching fluctuations of the Dutch florin, a fall in which would make him comparatively poor.

MARSHAL CHANG RESIGNS HIS POST AS COMMANDER

Peking, China.—Thirty-five-year-old Marshal Chang Hsiao-Ling, who resigned as commander-in-chief of the Chinese army operating against the Japanese in the north, explained to the government he considered himself unfit to command.

His resignation climaxed a long period of criticism of his administration of the Chinese defense forces which, since September, 1931, have been almost steadily withdrawing before the Japanese. In a telegram to the Nanking government the young marshal said:

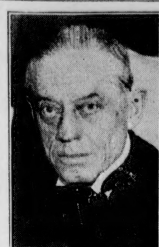

"After the loss of the three eastern provinces (including Manchuria), I tried my best to remedy my fault but the fall of Jehol convinced me I am unfit to keep command."

Chang succeeded his father, the late Marshal Sheng Tao-Lin, as war lord of Manchuria in 1928.

Peking, China.—The arrest and execution by the Chinese of Marshal Tang Yu-Lin, who governed the province of Jehol until that territory was taken over by the Japanese, was reported here today.

A reliable source said General Tang had been seized at Hsi-Engkow, it was through the Great Wall. Troops of Marshal Chang Hsiao-Ling, who has just resigned as the principal North China military commander, made the arrest, it was said.

FIRST MATE BECOMES K.C.

The King has approved the appointment of Mr. Lewis Nod to be King's Counsel. Mr. Nod, in his youth, sailed on liners between London and the East and obtained his First Mate's certificate. Being ambitious to be a barrister, he has risen to be a successful junior counsel in the Admiralty Court and a Lloyd's salvage arbitrator.

Political Disturbances

Foreign Correspondents In Germany Face Expulsion Measures

Berlin, Germany.—Five persons were killed and several injured in political disturbances in four German cities.

In Breslau, one Nazi was killed and five wounded when shots were fired from trade-union headquarters upon a group of 250 brown-shirted marchers.

Two Nazis were killed and six injured when a funeral procession in Düsseldorf was fired upon. In Wuppertal a Reichsbanner man was killed by unidentified assailants.

A Communist leader was found shot to death on a street in Duisburg, while a worker was seriously injured in his home by an unidentified person.

Foreign correspondents in Germany have been warned that expulsion measures are being prepared to apply to those who have "persistently misrepresented the internal situation."

Discuss Railway Problems

Diverse Opinions Held In Ottawa Debate

Ottawa, Ont.—Joint operation of the Canadian National and Canadian Pacific Railways was termed the only lasting solution to transportation problems, by Dr. Peter McGibbon, Conservative, Muskoka, in the House of Commons.

From the other side of the House, Hon. Peter Hennrich, former Liberal Minister of Labor, attacked the government legislation implementing the recommendations of the Duff commission on transportation on the ground it would establish exactly what Mr. McGibbon advocated—joint operation of the railways.

To Help British Farmers

London, Eng.—Major Walter Elliott, Minister of Agriculture, introduced in the House of Commons a bill designed to re-organize British agriculture and bring prices of British farm products to a remunerative level. It would empower the government to protect organized markets by regulation of imports through quotas or other means from any food of overseas imports.

A HAPPY PICTURE WITH A SAD ENDING

Our photograph shows Lord Lovat in a happy mood at the Steeplechase meeting near Chipping Norton, just before his son, Simon Christopher, Master of Lovat (right), left him to ride in one of the races. When the young man returned after the race to thank to his father and mother (seen in the background) Lord Lovat sank to the ground and then died.

Approves Financial Move

London Daily Mail Thinks Canada's Intention Is "Wise Step"

London, Eng.—The Daily Mail, Conservative organ, described the alleged intention of the Canadian government to ask parliament for extraordinary powers in the matters of finance as a "very wise and timely step."

"There are many factors," it continued, "which must operate strongly in Canada's favor. Her banking system is free from most of the weaknesses which brought difficulties elsewhere. She has not a multitude of small mutually competitive banks but a close co-operation between 11 large banks under the Bankers' Association."

The Daily Mail refers to the report the government would ask parliament to invest it with all the powers conveyed under the "peace order" and good government clause of war time legislation. This clause would give the government power to initiate practically any measure thought necessary to the welfare and stability of the Dominion.

Tribute To Cernak

Chicago Citizens Pay Respects To Slain Mayor

Chicago.—The body of Mayor Arthur J. Cernak lay in the shrouded parlor of his home as Chicagoans went about their affairs at a slower pace after securing an impressive tribute to the mayor who rose from immigrant to man.

But no floral piece adorned the casket. A streamer of lilacs and roses, President and Mrs. Franklin D. Roosevelt. The president, for whom the bullet that brought death to Chicago's executive was intended, was represented by a military aide, Lieut.-Col. Campbell B. Hodge.

From the time the train bearing the casket arrived until it was interred in the city hall, the citizens observed a minute calm. The motorcade of official automobiles followed the hearse through the Loop district, past Mayor Cernak's workshop—the city hall—and to his home on the northwest side, numbered 100.

Shipping Bill Introduced

To Be Studied By Committee On Banking and Commerce

Ottawa, Ont.—One of the largest single pieces of legislation to come before parliament in years was introduced in the senate when Rt. Hon. Arthur Meighen, government leader, presented a new shipping bill.

Containing more than 300 sections the bill will consolidate and modernize Canadian shipping legislation and will take the place of the part of the Imperial Shipping Act which now has effect in Canada.

Although Canadian-owned ships under the bill pass completely under the Canadian-made law the unity of the empire's mercantile marine fleet will be preserved. Canadian ships will be certified as British ships of Canadian registry.

The bill was given first reading by the senate and will be studied by the committee on banking and commerce.

Prior to the passing of the statute of Westminster, defining the complete legislative independence of the Dominion, Canadian ships outside Canadian territorial waters operated under laws enacted by the parliament of the United Kingdom.

May Reduce Number Of Police Magistrates

Alberta Has Lowered Appropriation As A Matter Of Economy

Edmonton, Alberta.—Estimates introduced in the Alberta legislature for the attorney-general's department show a reduction of \$13,758 compared to last year's figure and it is understood a reduction in the number of police magistrates in the province is planned by the government.

The appropriation for police magistrates dropped from \$68,205 to \$52,180. Attorney-General J. F. Lymburn said the government would place some magistrates "on a fee basis, or there may be a reduction in the number employed."

Ready To Leave League

Tokyo, Japan.—The cabinet approved and sent to the prime minister the draft of a resolution which Japan is expected to notify the League of Nations about March 20 of her withdrawal from that international body.

Soviets Taking No Part

Moscow, Russia.—The Soviet government has refused to participate in the League of Nations consultative commission which is to deal with the China-Japanese conflict. The Soviet government has refused to send any Japanese participants toward the Soviet administration.

Tractors Overhauled

W. I. HARRIS

Local & General

Mrs. Berger and Gordon spent the week end in Nanton.
 Jack McIntyre is confined to his home with the measles.

Mrs. J. S. Collins was a Lethbridge visitor Tuesday, taking medical treatment while there.

Mrs. John Archibald of Conrich is the guest of Mrs. Arthur Nelson.

Miss Mary Zing of Vulcan is the guest of Mrs. A. Nelson for a few days.

Mrs. J. N. Beaubier was a Calgary visitor Monday of this week.

Mr. and Mrs. Art Anderson of Calgary are spending a few days visiting at their farm.

Dinner hostesses this week included Mrs. McRae, Mrs. Cain and Mrs. Higgins.

Mr. and Mrs. R. I. Baker and Caroline spent the week end in Calgary.

Louie Fath and family expected to move to the farm this week.

Miss Mary Cook was a Lethbridge visitor over the week end.

E. Larkins and family have taken up residence in the Matlock house, formerly occupied by Mr. Davies.

Mrs. McCullough entertained at dinner on Sunday in honor of Mr. and Mrs. W. Tyler who left Monday for London, England.

Luchia's service station has been in the hands of the cleaner this week and the results are very gratifying.

Mrs. Campbell was bridge hostess on Saturday when two tables of bridge were in play. Mrs. Freezo won the first prize and Mrs. H. Smith consolation.

The W. I. will hold a bake sale in the store occupied by the Champion Trading Co. on Saturday March 25.

J. Anderson played with the Vulcan orchestra on Friday evening, when they supplied music for a dance at Mossleigh.

Miss Lois Philpott is the guest of Mrs. J. Anderson for a few days before leaving for her home in the Peace River.

Word has been received in town of the marriage of Gerald Groves in the Peace River country. Particulars will appear in a latter issue.

Mrs. W. E. Watkins entertained the Amity Club on Wednesday. A pleasant afternoon was spent by those present.

The Vulcan and Champion midgets met on Vulcan ice on Saturday. Due to soft ice the game was low. Score 10 in favor of Champion.

Don't forget the O.E.S. dance to be held in the Champion Community Hall on Friday March 17th. A good time is assured.

The tang of spring is in the air these days and with the preparation for seeding underway in every direction a general improvement in conditions is assured.

Ed Miller moved his blacksmith equipment to Carmanay Wednesday, preparatory to opening a shop at that point.

Word received from Glen Clever who is now located at Compton, California indicated that although the earthquake shock was quite severe in their territory, no injuries were received.

Mrs. Alexander, delegate, Mrs. D. Watkins, Mrs. Hagerman and Mrs. M. Clever are attending the Women's Institute convention in Lethbridge.

We Pay Higher Prices for Farm Produce

McCullough Bros.

Local and General

Found—8 inch Crescent wrench and pair of pliers. Owner can have same by calling at Chronicle office.

Miss Mavis Moffatt is one of the artists contributing to the program of the Railroaders Annual St. Patrick's dance to be held in the Massey Hall, Lethbridge next Friday evening March 17th.

Mr. W. S. Gorsche of Vancouver is in Champion and plans to spend the summer on his farm northeast of town. Mr. Gorsche reports a cold wet winter at the coast and lots of snow.

Heute ladies wear will make their first spring showing of dresses and coats at McCullough's store Monday. You are invited to call and inspect the new season's styles.

The death of Jiggs, a dog owned by J. S. Collins was very much regretted by many in town. It appears that the dog became the victim of several other canines in town and in no time bruised him so badly that death was considered a merciful way out for him.

Billy, little son of Mr. and Mrs. R. Hood was operated on last week for fluid on the lungs and has made some slight improvement since, though still very ill. The little fellow is a patient in St. Michael's hospital Lethbridge.—Lethbridge Herald.

Personal charm is a matter of choice. Today's styles demand a proper foundation garment. Charns of Canada is the answer to this demand, combining style, health and comfort features. Made in Canada for Canadians by Canadians.

Mrs. Theriault has taken the agency for the southern part of Alberta, for the charming, correct, and expected to be in Champion in a few days when she will call on the ladies and display the above garment.
